WASTE OIL TANK compliant with decree 392/96

Double self-supporting vertical cylindrical hermetic container with flat bottom, designed for the collection of used oils. Consisting of an internal tank in contact with the oil and an external one, with the function of safety and containment tank, in which a removable filter drain and relative hinged lid is incorporated. The internal level is monitored by a visual level indicator.

They can be placed directly on flat surfaces without special precautions.

Studied in compliance with the D.L. 27/01/1992 n. ° 95 implementation of directives 75/439 EEC and 87/101 EEC.

NB: Models with a capacity of 260 and 500 litres in compliance with decree 392/96
